

How do you regard the book by H.
Lederberg - Animal Genetics & Medicine?
Haworth - London - 1947. ??

Dear Josh: Never question
the veracity and/or accuracy
The Rattor — on Lederberg

Joshua Lederberg (left), associate professor of genetics at the University of Wisconsin, receives congratulations from Gail M. Dack, president of SAB, after formal presentation of the Eli Lilly Award

C&E News 31, #35, 3550 (1953) [8/31]

I fell asleep at 6⁴⁵ AM. while eating an onion-mustard-ketchup sandwich — and wakened at 12⁰⁰ AM. with Lederberg on my mind. Be not disturbed — sometimes I awake thinking of the role of starch on a hoisted shirt. Cordially Karel Prošlink

12.20 AM.

Journal Lectures, associate professor of genetics at the University of Wisconsin, received the Eli Lilly Award in bacteriology. The award is given annually to a bacteriologist under 35. Dr. Lederberg originally demonstrated that genetic recombinations of well-defined characteristics take place in *E. coli*. The properties concerned were of biochemical nature and his work caught the attention of both geneticists and biochemists.

[IS FOR ADDRESS]
